

Four top grants from the EU to Norway

February 20, 2013 - 05:15 - Source:[Read the full story at the Research Council of Norway](#)[1]

Four researchers affiliated with Norwegian universities have won ERC Advanced Grants for 2012. Two are researchers in science and technology while two are in fields in the social sciences and humanities.

The researchers can look forward to receiving between NOK 15–20 million in EU funding for their projects over a five-year period.

Andreas Kääb from the University of Oslo is documenting and analysing changes in glacier mass using laser and satellite-radar measurements. The results will be combined with digital terrain models in order to establish a global glacier mass continuity – the difference between the accumulation and reduction in volume of glacial ice and snow.
